

Your Company LOGO	Project Name:	FIIstudent	Test Designed by:	Ursu Dragos	Comments: Tests were made manually, on 2 different phones Iphone XS and oneplus 6, on locally installed Windows 10 and Linux Mint 19. Tests on Mac OS were made with a Macbook Pro. Overall impression, from a compatibility standpoint, the website "FIIstudent" passes inspection, and is considered to be "Platform independent", with some minor tweaks.				
	Module Name:	Compatibility	Test Designed date:	02.05.2019					
	Release Version:	Initial release v1.0	Test Executed by:	Ursu Dragos					
			Test Execution date:	02.05.2019					
Pre-condition	The purpose of this test is to find out "FIIstudent's" compatibility between different browsers and platforms, mobile and desktop. We have to see the site's interaction, whether everything is shown as it should be .								
Dependencies:									
Test Priority	Medium								
Test Case#	Test Title	Test Summary	Test Steps	Test Data	Expected Result	Post-condition	Actual Result	Status	Notes
1.) Google Chrome, latest version, Windows	Windows_Chrome	Loading the pages in Google Chrome, latest version on Windows 10, with latest patches	Load the page into the browser	Website's primary link and then all of it's pages. <a href="http://fiistudent.ddns.us/">http://fiistudent.ddns.us/</a>	The page should load just fine, as expected, everything shown clearly, text loading ok, images rendering, forms, internal/external links, readability and overall experience with the website should be normal for a regular user.	The browser should have the latest updates, to be connected to the Internet, and to make sure that nothing it's blocking the site (firewall/browser etc.)	The webpages are loading as expected, nothing out of the ordinary, all of the pages load just fine, every link works, forms work, all the fields work, images render just fine, nothing out of the ordinary from a compatibility point of view on Chrome.	Passed	Although it loads fine on first glance, on a personal note, i don't like how it's resizing the windows in register page When making the window smaller, a white area appeared in the lower half of the screen, nothing serious.
2.) Safari.		Loading the pages	Load	Website's primary link	The page should load just fine, as expected, everything shown clearly, text loading ok, images	The browser should have the latest updates, to be connected	The webpages are loading as expected, nothing out of the ordinary, all of the pages load just fine, every link works.		

latest version on Mac OS Mojave	Mac_Safari	In Safari, latest version on Mac os Mojave.	the page into the browser	and then all of it's pages. <a href="http://fiistudent.ddns.us/">http://fiistudent.ddns.us/</a>	rendering, forms, internal/external links, readability and overall experience with the website should be normal for a regular user.	to the Internet, and to make sure that nothing it's blocking the site (firewall/browser etc.)	forms work, all the fields work, images render just fine, nothing out of the ordinary from a compatibility point of view on Safari.	Passed	
3.) Google Chrome, latest version, Linux Mint latest	Linux_Chrome	Loading the pages in Safari, latest version on Linux Mint 19.	Load the page into the browser	Website's primary link and then all of it's pages. <a href="http://fiistudent.ddns.us/">http://fiistudent.ddns.us/</a>	The page should load just fine, as expected, everything shown clearly, text loading ok, images rendering, forms, internal/external links, readability and overall experience with the website should be normal for a regular user.
